## Work Experience

**IT Intern**                                         CIC Microfinance, Kigali, Rwanda (2024)

- Supported the IT department by maintaining and troubleshooting systems.

- Gained experience with database management, system security, and network configuration.

- Assisted in developing new features for internal financial software.

- Collaborated with cross-functional teams to resolve technical issues.

## Project

**Doctor Appointment Management System (DAMS)**

- Designed and developed a PHP-based web application allowing patients to book, view, and manage appointments with doctors.

**Restaurant Website Template [Restaurant](#)**

- Designed a responsive and modern restaurant website template using HTML, CSS, SCSS, and PHP for templating structure. Features include a dynamic menu section, reservation form layout.

**E-Commerce Platform Template [E-shop](#)**

- Developed a front-end e-commerce template built with HTML, CSS, SCSS, and PHP. Includes reusable components such as product grids, category filters, shopping cart UI, and user account pages.

**Headphone Store Template [Headphones](#)**

- Created a visually engaging single-product store template focused on headphones. Built using HTML, CSS/SCSS, and PHP includes product highlights, detailed specifications sections, and call-to-action elements optimized for conversions.

**Food Delivery Template [Food](#)**

- Crafted a food delivery service template featuring restaurant listings, filterable categories, and an intuitive ordering interface. Utilized HTML, CSS/SCSS, and PHP to ensure clean structure and easy integration.

**Simon Game (JavaScript) [Simon-Game](#)**

- Built an interactive browser-based Simon Game using JavaScript, HTML, and CSS. Focused on enhancing user engagement through sound effects, animations, and progressive difficulty.

# LeaderShip

**General Secretary**                              Student Union, Lycée Ibnou Cina, N'Djaména, Chad

- Oversaw student activities and events, acting as a liaison between the student body and administration.
- Led initiatives to improve academic and extracurricular programs.
- Developed leadership skills through organizing campaigns and managing student resources.

**Member – Union of Chadian Students in Rwanda**

- Currently involved in initiatives supporting Chadian students in Rwanda.
- Aspiring to establish a technology company that will bridge innovation gaps within my community.

# Skills & Interests

**Languages**

- Arabic                                                                                          Native

- French                                                                                          Native

- English                                                                                          Fluent

- Spanish                                                                                        Medium

**Technical Skills**

- PHP, Python, JavaScript, MySQL, HTML/CSS, Express.js, Node.js, Mongoose, Database Management, Email Integration with PHPMailer
